John,

Brenda Cook, community relations and I met with the Mayor of Norphlet, for the MacMillan site, on January 23, 2014, to discuss the site and the anticipated community needs. During this meeting the EPA specifically asked about the community needs and the potential for a community meeting and he replied that if the EPA had one he did not think that anybody would show up. He suggested that a meeting would be necessary/required when the EPA had plans to present new information related to sampling activities and/or laboratory results. The EPA can contact the Mayor after the site is final on the NPL to get an update on the community needs/expectations, thanks

Charles Fisher (6SF-RA)

Carl's expectation is that we will have a community meeting shortly after finalization on the NPL.

Charles,
Please work with site assessment, community relations, and external affairs on a communication strategy regarding the Final Listing for the MacMillan site. Thanks CAS

We need to be prepared to roll out a community strategy on MacMillan concurrent with the final listing.

Subject: NPL Update Schedule

We are anticipating an NPL update April 30, 2014-as always this is a moving target-as there are many steps at HQ's that have to happen before the regional schedule can take place. I am attaching our Regional schedule-and I will be scheduling a meeting for next week. We have 2 sites

MacMillan Ring Free Oil will be added to the final NPL and Delta Shipbuilding will be added to the proposed NPL-final narratives will be sent once I receive them from HQ'a/
